

To: District 66 Parents
From: Roy Webb, Superintendent
Re: H1N1 Virus
Date: October 14, 2009

The intent of this letter is to inform District 66 parents that the Canton School District has received word of its first confirmed case of H1N1 virus of a District 66 student. All District 66 schools will continue with the preventative measures implemented at the beginning of the school year. These measures include the use of disinfectant in the classrooms and school facilities, along with encouraging students and staff to use good hand washing techniques. We are requesting that parents keep their children home if the student has a fever, and school staff has been instructed to remain home if they have a fever. We will keep our parents and the community updated on the Canton Union School District #66 website at www.cantonusd.org.
